FCC Exams set for Saturday, March 31 0930 hrs

Our next exam session will be on Saturday, March 31 beginning promptly at 0930 in the Conference Room at Kaua'i Island Utility Coop on Pahe'e St. in Lihu'e.

Anyone interested in sitting for an exam should e-mail hamexams@kauaimail.net with full legal name, contact phone, and the class of license they wish to sit for. We will offer all classes...Technician, General, and Extra. While pre-registration is legally not required, we can't be sure we'll have enough of the required materials for walk-ins. If you register and don't show up, no worries. You don't pay your \$14 until the day of the exam.

Exams are still \$14 cash only. Full details and a question pool are sent to those registering.

The current plan is for NH7YS to present his "new ham" class following the exams.

We need three Extra class VEs for the exams.

License Prep class March 24

AH6TA will be giving a license prep class on Saturday, March 24th, beginning at 0830 hrs. Technician class will be covered in the morning; there will be a one-hour break for lunch, and the afternoon will be given to General class prep. The location of the class will be announced in about a week, but will likely be on the West Side. The class is free.

KCC may be our new license prep venue

Kaua'i Community College is engaging in discussions with KARC to offer amateur radio license prep classes as part of the evening curriculum. We'll keep you posted on progress. If you have any input, please forward it to AH6TA at elaine@kauaimail.net .

Amateur radio video

Randy Blake came across a particularly good info video on ham operations; here's the link, and I'm putting it into the updated web site and FB page.

I think the important part is that it is an NBC video, well done, and discusses the false alert and how ham radio is critical to overcoming those instances.

[Da Video...](#)

Yup...yours truly is your new (well, in contemporary terms..."well used" in other terms) PIO...ICS talk for Public Information Officer...and I'm beginning putting together a structure for keeping our media and public presentation capabilities up to date and capable. Dick Olsen did a really nice job of the basic redesign of the website, and it'll be easy to maintain from now on.

The Facebook page just needs a little weekly TLC and attention.

If you are reasonably comfy with HTML (ie., you have a wsiwyg html editor, etc.), and/or Facebook-ese, you could be a backup admin. Let me know.

de AH6TA

Well...that's it for now...back to cleaning the kitchen...
